

How Zeifmans Accelerates Technology & StartUps Success

From **Day 1** of your tech company or startup venture, Zeifmans helps you break through the barriers to reach the next phase of your life cycle. **Here's how.**

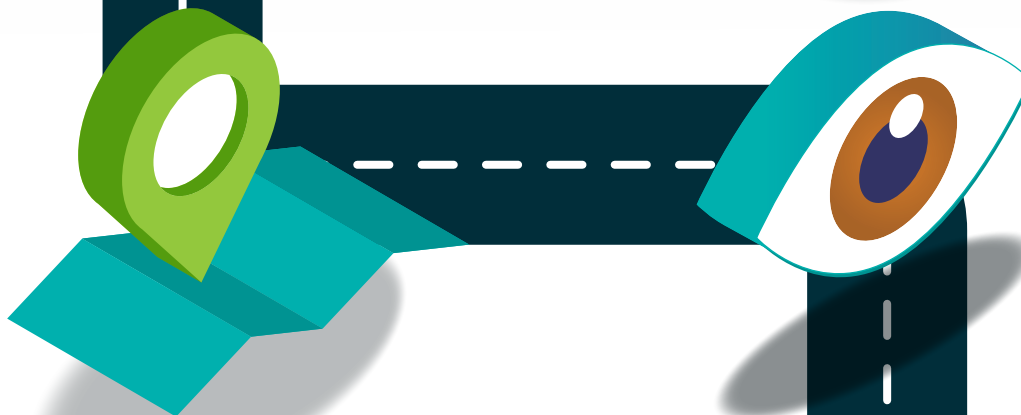

It all begins **with a relationship**. Our team gains an understanding of who you are and where you want to go.

Our team's expertise will guide you in **establishing a foundation** for the future. We help you choose the right corporate structure and leadership team.

Through this relationship, you gain access to our partners' unparalleled **level of experience**, expertise, and connections throughout the world.

We set you **on the right path** by helping you understand cash flow and stock options, crafting a business plan, and raising capital.

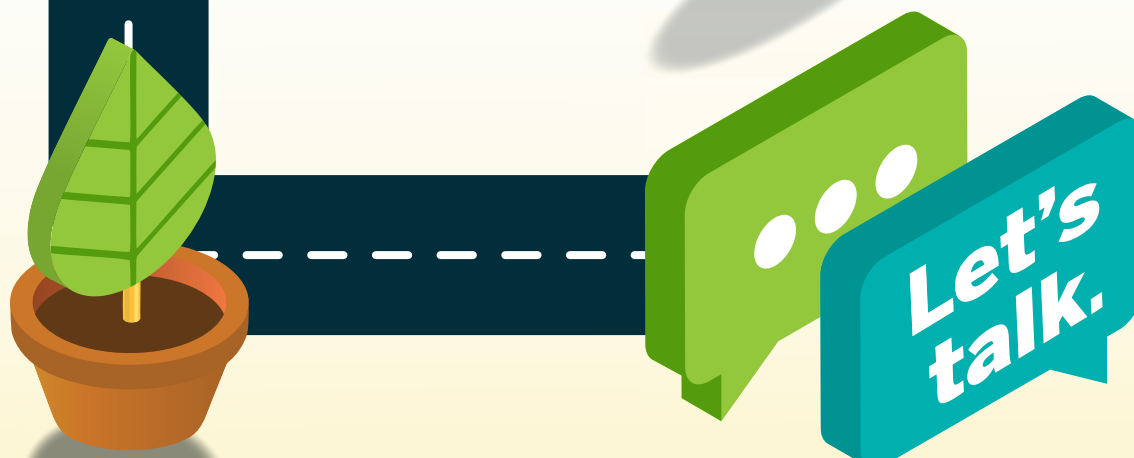

Whatever challenges come your way, our team offers **actionable insight** to progress your business to the next level.

Our **extensive knowledge** of available incentives (like SR&ED) and grants will enhance the likelihood (some of which do not need to be repaid!) that you will receive funding when you need it.

We ensure you consistently **remain compliant** with the accounting, operational, tax, and financial reporting requirements in Canada and abroad.

As you **grow your business** from Day 1, to the potential road of an IPO, and beyond, our dedicated team will assist every step of the way.
